

ENGINE MID-PLATES

Our Engine Mid-Plates are precision CNC-machined from 1/4" 6061 T-6 Aluminum and are strong enough for today's high horsepower race cars. Used in all race cars we build.

Engine Plates and Limiters

ENGINE PLATES

Our Engine Plates are precision CNC-machined from 1/4" 6061 T-6 aluminum and are 12" tall x 36" wide. Header clearance and engine removal are just some of the advantages when using our Engine Plates. Contact us for custom fabricated engine plates.

ENGINE LIMITERS

Our Engine Limiters are designed to hold the engine in place. Mounting to the engine is a load spread design, using the entire factory engine mount boss for strength, not an inferior one-stud design like some others. Thus it keeps the engine's forward and rearward motion at a standstill.
